

Every Road Leads Back To You

V1

Kiss me when we're all alone
Like our hearts are racing, not made of stone
Kiss me before it gets too late
Kiss me, the night's not long enough
And tomorrow I won't be strong enough
Kiss me, it's getting to be so late

CHORUS1

Every road leads back to you
I could be happy with just part of you
Every road leads back to you
I could be happy, do you feel it too?

V2

Kiss me then touch my skin
Like it's just business, like it's always been
Kiss me before it gets too late
Kiss me and hide behind
A world full of sadness in those eyes
Kiss me it's getting to be so late

CHORUS2

Every road leads back to you
I could be happy with just part of you
Every road leads back to you
I could be happy, do you feel it too?
I could be happy with just part of you
I can feel your heartbeat, can you feel it too?

CHORUS3

Every road leads back to you
I could be happy with just part of you
Every road leads back to you
I could be happy, do you feel it too?
Every road leads back to you
I could be happy with just part of you
Every road leads back to you
I can feel your heartbeat, can you feel it too?
