

You Said Things

V1

Stand where you are
So I can see you
Underneath neon light
Beauty deceives you

You say you wore your heart on your sleeve
You say you don't do that anymore
You say I'm not like all of the others
So let's stop before...

Chorus

You said things that you shouldn't have said
I liked them
But they messed with my head
You said things that I cannot forget
Words fall from your mouth
Without regret

V2

Stand next to me
So I can feel you
In between pulsing, flashing light
I see the real you

You say you've got battle scars
You say the pain helps you get by
You say you'd given up on forever
Well, so had I

Chorus

You said things that you shouldn't have said
I liked them
But they messed with my head
You said things that I cannot forget
Words fall from your mouth
Without regret

V3

You say you've got battle scars
You show them off to those who try
You say they serve as a reminder
And so do I

Chorus

You said things that you shouldn't have said
I liked them
But they messed with my head
You said things that I cannot forget
Words fall from your mouth
Without regret

Without regret...

(Spoken)

You say what you want
Until you get what you get
Words fall from your mouth
With no regret
