

Erased

Step right up, take it like a man
If that's what you are
Save your crocodile tears for your boys and your beers
Don't play me like I'm your guitar
You keep moving your mouth, digging your own grave
You're gonna get buried alive
Yeah, I can spot a fake, a real loser like you
Close your eyes because it's past your bedtime
Because you've been...

Erased

Every email, every photo
Can't remember your face
You've been replaced
How does it feel to see someone else in your place?

Sit right down, let it all hang out
Confess your sins to me
Forget forgiving, that's not my style
Save your lame-ass apologies
Get a copy of the book *I'm Not That Into You*
And read it from start to end
You'll discover the truth, you'll discover why
You've really got no defense
Because you've been...

Erased

Every email, every photo
Can't remember your face
You've been replaced
How does it feel to see someone else in your place?

Don't let the door hit you on the way out
That's what the game of love is all about
There's nothing left, don't scream and shout

Erased

Every email, every photo
Can't remember your face

You've been replaced

How does it feel to see someone else in your place?

Tick tock, tick I've heard enough

Tick tock, tick tock your time is up
